

WHY KEERAN NETWORKS PROMOTES MERAKI SWITCHES

A powerful centralized management interface gives administrators deep visibility into the network and how it is used. See which switches are near capacity across all of your sites.

Keeran Networks will quickly provision and reconfigure switch ports with security, Quality of Service (QoS), and more. The Meraki dashboard lets us provide unified policies, event logs, and monitoring, making switch management efficient and scalable.

THE BENEFITS OF MERAKI SWITCHES

DITCH DOWNTIME

To set up a Meraki Switch, just plug it in. No need for repetitive, command-based configuration

PROPER TROUBLE SHOOTING

Your business flows through your network, and you can't afford complications. Drastically reduce time to resolution with a variety of powerful troubleshooting tools, such as remote cable testing and packet captures, that help isolate and troubleshoot network issues.

HIGH RELIABILITY

All Cisco Meraki MS Switches include a limited lifetime hardware warranty that provides next-day advance hardware replacement.

WIRED SECURITY WITHOUT COMPROMISE

Whether deployed in an office environment, or a medical clinic, Meraki switches make enforcing security policies a breeze. Along with Keeran Networks enabling multiple policies at the port level and apply across the entire network with just a few clicks.

ZERO TOUCH CONFIGURATION

Scales with organization needs and requirements.

BUILT-IN APPLICATION LAYER VISIBILITY

Meraki is the only switch to include integrated layer 7 fingerprinting. Identify hundreds of applications, from business apps to BitTorrent and YouTube.

If you are interested in learning more about the benefits of utilizing Meraki Switches within your organization, [contact Keeran Networks](#) today to see how we can get more from your technology investment.
