# KEERAN NETWORKS SUPPORTS MERAKI MX SERIES FOR CLOUD MANAGED SECURITY

The Cisco Meraki MX series is 100% cloud-managed, so installation and remote management is truly zero touch, making it ideal for distributed branches and data center locations. Natively integrated with a comprehensive suite of secure network and assurance capabilities, the MX eliminates the need for multiple appliances to keep your environment streamlined and simplified.

THE BENEFITS OF MERAKI MX SERIES

PRESERVE YOUR BANDWIDTH INVESTMENT

Increasing the amount of internet speed available to your organization can lead to simply increasing the amount that people waste. Layer 7 fingerprinting technology lets administrators identify unwanted content and applications, and prevents recreational apps like BitTorrent and Spotify from wasting precious bandwidth. Best of all, these industry-leading Layer 7 security engines and signatures are always kept up-to-date via the cloud, simplifying network security management and providing peace of mind to you and your IT administrators**.**

HARDWARE YOU CAN BUDGET AROUND

Cisco Meraki MX appliances include a limited lifetime hardware warranty that provides next-day advance hardware replacement. Cisco Meraki's simplified software and support licensing model also combines all software upgrades, centralized systems management, and phone support under a single, easy-to-understand model. Eliminate surprises, minimize downtime, and have a budget you can believe in with a Cisco Meraki solution.

GET NEW LOCATIONS ONLINE AND SECURE, FAST AND AT RANGE

Built on Cisco Meraki's award-winning cloud architecture, the MX is the industry's only 100% cloud-managed solution for unified threat management (UTM) and SD-WAN in a single appliance. MX appliances self-provision, automatically pulling policies and configuration settings from the cloud. Powerful remote-management tools provide network-wide visibility and control, and enable administration without the need for on-site networking expertise so you aren't paying for constant flights on top of the rest of the costs of getting up and running.

UNRELIABLE INTERNET CONNECTION?

Integrated LTE Advanced functionality removes the need for external hardware while providing for cellular visibility and configuration within the Meraki dashboard. That means that even in the case of an outage that would take out you and your neighbour you can tap into cellular data to keep your operations moving.

If you are interested in learning more about Cisco Meraki's MX Series and implementing this multifunctional solution within your organization, underline contact Keeran Networks today to see how we can get more from your technology investment.
